-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-31 and 37 in the reply filed on August 16, 2005 is acknowledged.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: FORMING A PLURALITY OF THIN-FILM DEVICES USING IMPRINT LITHOGRAPHY.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-31 and 37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1-31 and 37 recite a self-aligned imprint lithography process and use the acronym SAIL. The use of an acronym that is not well known outside the applicant's own work is acceptable, but cannot be used to define the invention over the prior art. The applicant's specification defines SAIL as a lithography process that involves "contact between a master with features" and the

Art Unit: 2812

"substrate material to be patterned". This appears to be the same as other imprint lithography methods such as nano-imprint lithography, step and flash imprint lithography or hot embossing lithography. Without further definition of the process, the use of a specialized acronym throughout the claims as a means to claim an invention and set it apart from the prior art is confusing, and will be interpreted by the examiner as a general imprint lithography process.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 17 and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Chou (US 2002/0132482 A1).

As to claims 1, 17 and 37, Chou teaches a method of imprint lithography wherein thin film devices are formed on a flexible or non-flexible substrate. See paragraphs [0001], [0016], [0019] and [0023].

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Geyer whose telephone number is (571) 272-1958.
